

Examples of System Output

1. Alert: Sensitive File Copied to USB Drive

SECURITY ALERT	
Alert Type	: Unauthorized File Movement
User	: employee01
File	: confidential.xlsx
Classification	: SENSITIVE
Operation	: COPY
Source	: C:\Company\Documents
Destination	: E:\USB\
Authorization	: DENIED
Risk Level	: HIGH
Status	: ALERT GENERATED

Meaning: The system detected that a sensitive file was copied to a USB/removable drive without authorization.

2. Integrity Failure: File Hash Mismatch Detected

INTEGRITY FAILURE	
File	: confidential.pdf
Operation	: FILE TRANSFER
Original Hash	: A8F21C7D...92BD
New Hash	: 7C92AB14...41EF
Hash Algorithm	: SHA-256
Integrity	: FAILED
Risk Level	: HIGH
Status	: INVESTIGATION REQUIRED

Meaning: The SHA-256 hash calculated after the transfer does not match the original hash. This indicates that the file content changed or the transfer resulted in a different file.

3. Suspicious Movement: 200 Files Transferred to Unknown Directory

SUSPICIOUS ACTIVITY DETECTED	
User	: employee02
Files	: 200
Operation	: MOVE
Source	: C:\Company\Data
Destination	: C:\Unknown\Temp
Destination	: NOT APPROVED
Transfer Rate	: 200 files / 5 minutes
Risk Level	: HIGH
Detection	: Abnormal File Movement
Status	: ALERT GENERATED

Meaning: The monitoring engine identified an unusually large number of files being moved to a directory that is not part of the approved transfer locations.

4. Normal Authorized File Transfer

It is also useful to show a **normal/allowed event** so that your project demonstrates both normal and suspicious activity.

FILE TRANSFER LOG	
User	: employee03
File	: project_report.pdf
Operation	: COPY
Source	: C:\Company\Reports
Destination	: D:\Approved\Reports
Classification	: NORMAL
Authorization	: ALLOWED
Integrity	: PASS
Risk Level	: LOW
Status	: TRANSFER APPROVED

5. Final Audit Summary

The individual events can be combined into a final audit report:

```
=====
SECURE FILE TRANSFER MONITORING SYSTEM
FINAL AUDIT SUMMARY
```

=====
Reporting Period : 01-09-2026 to 15-09-2026

Total File Events : 1,250

Authorized Transfers : 1,100

Unauthorized Transfers: 150

Sensitive File Alerts : 25

Abnormal Transfers : 42

Integrity Failures : 12

SECURITY INCIDENTS

[HIGH] Sensitive file copied to USB drive

[HIGH] File hash mismatch detected

[HIGH] 200 files moved to unknown directory

INTEGRITY STATUS

PASS : 1,180

FAIL : 12

NOT CHECKED : 58

RISK SUMMARY

LOW : 900

MEDIUM : 250

HIGH : 80

CRITICAL : 20

OVERALL SECURITY STATUS

⚠ HIGH RISK

Recommended Action:

Review unauthorized transfers, investigate abnormal file movement, and verify all integrity failures.

=====

Summary of Expected Outputs

Output	Example
Security Alert	Sensitive file copied to USB drive
Integrity Failure	File hash mismatch detected
Suspicious Movement	200 files transferred to unknown directory
Normal Activity	Authorized file copied to approved location
Audit Summary	Total events, alerts, integrity results, risk levels and recommendations

These examples directly demonstrate the project's main purpose: **detect file activity** → **identify sensitive/unauthorized movement** → **verify integrity** → **detect abnormal behavior** → **generate alerts** → **produce an auditable security report**.
